mummichog: PC_vs_Control
красный — q_BH<0.05; оранжевый — только p<0.05
D4&E4-neuroprostanes formation
Porphyrin metabolism
Urea cycle/amino group metabolism
Limonene and pinene degradation
Tryptophan metabolism
Ascorbate (Vitamin C) and Aldarate Metabolism
Pentose and Glucuronate Interconversions
Pyrimidine metabolism
Glycosphingolipid biosynthesis - ganglioseries
Lysine metabolism
Biopterin metabolism
Purine metabolism
Sialic acid metabolism
N-Glycan Degradation
Pentose phosphate pathway
