mummichog: PC_vs_Control
красный — q_BH<0.05; оранжевый — только p<0.05
Tryptophan metabolism
D4&E4-neuroprostanes formation
C21-steroid hormone biosynthesis and metabolism
Porphyrin metabolism
Methionine and cysteine metabolism
Saturated fatty acids beta-oxidation
Vitamin B12 (cyanocobalamin) metabolism
Urea cycle/amino group metabolism
Pyrimidine metabolism
Drug metabolism - cytochrome P450
Linoleate metabolism
De novo fatty acid biosynthesis
Limonene and pinene degradation
Biopterin metabolism
Glutathione Metabolism
