(a)
BC vs Control
De novo fatty acid biosynthesis
Glycosphingolipid metabolism
Vitamin B2 (riboflavin) metabolism
Omega-3 fatty acid metabolism
Omega-6 fatty acid metabolism
Linoleate metabolism
Vitamin A (retinol) metabolism
Bile acid biosynthesis
CoA Catabolism
Glycerophospholipid metabolism

(b)
BC vs PC
C21-steroid hormone biosynthesis and metabolism
Biopterin metabolism
Drug metabolism - cytochrome P450
Arachidonic acid metabolism
Androgen and estrogen biosynthesis and metabolism
Pentose and Glucuronate Interconversions
Omega-3 fatty acid metabolism
CoA Catabolism
Prostaglandin formation from arachidonate
Glyoxylate and Dicarboxylate Metabolism

(c)
PC vs Control
Hyaluronan Metabolism
Tryptophan metabolism
D4&E4-neuroprostanes formation
Porphyrin metabolism
Limonene and pinene degradation
Methionine and cysteine metabolism
Heparan sulfate degradation
Urea cycle/amino group metabolism
Biopterin metabolism
Saturated fatty acids beta-oxidation
