mummichog: BC_vs_Control
красный — q_BH<0.05; оранжевый — только p<0.05
Leukotriene metabolism
TCA cycle
Electron transport chain
Fatty acid oxidation
D4&E4-neuroprostanes formation
Lysine metabolism
C21-steroid hormone biosynthesis and metabolism
Lipoate metabolism
Prostaglandin formation from dihomo gama-linoleic acid
Putative anti-Inflammatory metabolites formation from EPA
Vitamin A (retinol) metabolism
Tryptophan metabolism
Glycerophospholipid metabolism
Prostaglandin formation from arachidonate
Pyrimidine metabolism
